Professional Summary

Enthusiastic MCA student and aspiring software developer with hands-on experience in MERN stack projects, basic IoT applications, and cloud fundamentals. I have working knowledge of AWS and enjoy building real-world applications through continuous learning and practice. Passionate about exploring new technologies, improving my skills, and contributing to a dynamic development team as a fresher.

Technologies

Programming: C, C++, SQL, Java, HTML, CSS, Python
Frameworks & Tools: MongoDB, Node.js, Flutter, Android, REST APIs, Flask, React
Cloud/DevOps: AWS, Git, GCP, EC2, Containers, GitHub

Projects

Sahayak AI – Akshaya Service Automation
- Developed a bilingual web platform to assist citizens in accessing Kerala government services.
- Implemented document guidance, appointment booking, and secure user, staff, and admin modules.

Smart Locker Security System
- Built an IoT-based locker security system using ESP32 and multiple sensors.
- Enabled unauthorized access detection and real-time alert monitoring.

Daily Expense Tracker – PHP, MySQL
- Web application to track, organize, and analyze daily expenses.
- Implemented authentication and MySQL-based data storage.

Healthy Food Store – Python, Android
- Developed a mobile and web application for ordering nutritious food products.

Education

Master of Computer Applications (MCA) *CGPA: 8.14*
Amal Jyothi College of Engineering (Autonomous), Kanjirappally *2024 – 2026*

Bachelor of Computer Applications (BCA) *CGPA: 7.6*
St. George's College Aruvithura, MG University *2021 – 2024*

Higher Secondary Education *86%*
St. Thomas HSS Erumely *2021*

Experience

Flutter Developer Intern *Apr 2025 – May 2025*
- Designed and developed a cross-platform recipe mobile app using Flutter and Dart.
- Implemented responsive UI, navigation, and backend integrations.
- Gained hands-on experience in debugging and Flutter state management.

Certifications

NPTEL: Cloud Computing (2025) | Internet of Things (2025) | Human-Computer Interaction (2025)
